

Eduard David Barrera Manrique

EXPERIENCE

BM TechLab, Bucaramanga: Frontend Software Developer

AUGUST 2023 - PRESENT

Development of optimized websites for small and medium businesses, applying technologies such as HTML, CSS, JavaScript, Node.js and React. Implementation of best practices for accessibility and responsive design. Development of more than 60 portfolio projects, including interactive applications and online stores.

FORMATION

Uniminuto, Bucaramanga: Software Engineering

July 2023-ACTUALITY

Studies focused on programming fundamentals, software design, databases and web development. Currently taking advanced courses in software engineering and application development.

PROJECTS

E-commerce Web Application:

I developed an online store with React and Node.js, integrating a shopping cart system and payment gateway. I implemented responsive design principles and accessibility best practices.

Task Management System:

I built an interactive web application to organize daily tasks, using JavaScript and CSS. Optimized for mobile devices with responsive design.
